Internal Quality Assurance Cell Report

In the recent academic year, the Internal Quality Assurance Cell (IQAC) has made significant strides in enhancing the academic and developmental activities of the institution. The following key achievements highlight this progress:

1. **Increase in Add-On Certifications**

The IQAC has overseen a significant increase in the availability of add-on certification programs. These certifications have been designed to provide students with additional skills, both technical and non-technical, enhancing their employability. Participation in these programs has surged, indicating their growing relevance in the current professional landscape.

2. **NSS and NCC Activities**

The institution has seen an uptick in student involvement in NSS and NCC activities, with numerous camps, drives, and social initiatives organized throughout the year. These activities have promoted leadership, discipline, and a strong sense of social responsibility among students, with growing enthusiasm for participation.

3. **Increased R&D Activities**

Research and Development (R&D) efforts have expanded, with both faculty and students engaging in more research projects. This has resulted in an increase in high-quality publications, patent filings, and collaborative projects with industry and academia. The institution's focus on research innovation is evident in the number of new initiatives and grants secured in the past year.

4. **Motivation for Faculty Development Programs (FDPs)**

Faculty development has been a priority, with concerted efforts made to motivate faculty members to attend more Faculty Development Programs (FDPs). This has resulted in a marked increase in the number of FDPs conducted, as well as higher participation levels. These programs have equipped faculty with the latest pedagogical techniques and subject knowledge, contributing to a more robust academic environment.

5. **Organization of IEEE Conference**

The IQAC successfully facilitated the organization of an IEEE Conference (ICACCM-2024), which brought together academics and professionals from diverse fields. This conference provided a platform for the dissemination of cutting-edge research, enhancing the institution's reputation in the academic community.
