## 8. Gap Analysis

**Subject:** Computer Networks (BCST-502)

**Session:** 2022-2023

### 8(a). Gap Identification:

Curriculum gaps in computer network syllabus include inadequate coverage of security, emerging technologies, QoS, network management, hands-on experience, current industry trends, and ethical/legal considerations. Addressing these gaps would better prepare students for real-world networking challenges.

## Internal Examination Grievance Redressal Mechanism

(w.e.f Session 2015-16)

A student shall be entitled to reevaluate his/her answer books on the basis of application. re-evaluation is done in following conditions-

- a. If the student is not satisfied with the given marks.
- b. If the student is marked absent but he appeared in examination.
- c. If there is any mistake in the totaling of marks.
- d. If any answer is unchecked by the evaluator.

The grievances related to internal examination is resolved as follows:

1. The evaluated answer sheet is shown to the student and if the student is not satisfied with the evaluation, he/she can raise the grievance to the respective faculty member. The faculty member will address his/her grievances and resolve it at their end.
2. If the student is not satisfied with the solution provided by the respective faculty member, he/she can raise the grievance to the concerned HOD and he/she will resolve it within his/her delegated domain of power.
3. In Case of any doubts after the solution provided by the HOD, the student may contact the examination cell.

Examination cell shall address all the applications pertaining to internal examination grievances against examination/evaluation within 10 days after the display of answer sheets to the concerned students. All applications should be addressed to centre superintendent.

Once received by the centre superintendent, the application of re-evaluation is forwarded to the respective head of the department. The concerned subject faculty member will re-evaluate the answer sheet in presence of centre superintendent. The re-evaluated answer sheet will be forwarded to the examination cell.

The examination cell will show the re-evaluated answer sheet to the concerned student.

## About Induction Program

Change is inevitable. The transition period is always challenging. As is the transition from pre-university academics to a professional curriculum for students. After the rigorous training and planning required to enroll in a professional college, students deserve time to unwind, form new relationships with fellow students, and become acquainted with their new surroundings. The induction program assists in making first-year students feel at ease by providing opportunities to showcase their talents and interests and shape their character.

An induction program is a forerunner of various on-campus and off-campus activities designed specifically for new students to fill the gap. The Induction Program is a wonderful blend of literary activities, cultural activities, personality development activities, Universal Human Values sessions, sports, and many other activities.

Tula's Institute believes that two main aspects are leading to good education, a supportive, nurturing environment, and exposure to growing technological innovations thus conducting a 21 days induction program for the newly admitted students.

Director  
Tula's Institute, Dehradun

## Day 1

### Registration and Inauguration

**The induction program** started on 5<sup>th</sup> September 2022 with the registration of newly admitted students. Nearly 500 students reported on day one of the induction program. As the student intake was high in number, the committee had developed a consensus to split the mass of students into Ten groups. Students participated in the registration and reporting procedure with enthusiasm. The induction team extended their active assistance to entrants to complete the registration process smoothly. During the process, the personnel attended to the queries of students successfully. As per the directives of the AICTE, handouts containing an overview of the program, the schedule of the entire Induction program, and welcome kits were distributed to the entrants during the registration process.

## TEAM BUILDING AND LEADERSHIP

### Objectives of Team Building and Leadership Activities

- 1) Working in a team, inculcating the values within the students for the team.
- 2) It is always about WE and US, not I or ME.
- 3) Assisting the member when things are not going your way.
- 4) Being supportive and helpful
- 5) Working for a common objective.
- 6) Attainment of TEAM goals.

The Team building activities for the students were planned on the first day of the Induction program starting with the classroom activities for all the students in their respective classes.

The students started the session by playing a few games at the beginning which was fun for them and entertaining. The activities were planned with a time limit. Some of the activities planned were Ice-breaking activities like balloon activity, Relay Painting, Dumb Charades, and Puzzle Solving. These activities were planned as indoor activities. All of the activities planned for students will aid in team bonding and will improve workplace projects that require teamwork.

*Balloon activity done by students to learn the coordination*

Students gain a better understanding of each other's strengths, weaknesses, and interests after participating in team-building activities together. This understanding allows them to work even more effectively together in the future. Certain activities can be designed to improve group communication and conflict resolution.

*Students playing the puzzle-solving game*

Collaboration within a group can aid in the resolution of difficult problems. Brainstorming is an excellent way for the team to exchange ideas and come up with innovative solutions. Teams can find the best solutions by working together.

*Dumb charades activities*

After the completion of team building activities, the students were taken for the outdoor activities where they played various games such as Water-Relay, Tug-o-War, and Blind football.

*Students showing their skills during Tug-o-War*

The motive for such games was to make a bond between the students and team them how to work on the ground and how to coordinate with each other.

**DAY 3**

## **Model Making Competition**

As part of the student induction program, the Model Making activity was organized on the 3<sup>rd</sup> day. The particular activity is organized to encourage students to brainstorm and come up with their own ideas for new models. These activities build confidence among the students and develop critical thinking skills in them. These events are a fun-filled activity-based learning time for these students. It expands their ability to think and design their own easy-to-use affordable models out of basic raw materials like popsicle sticks, bamboo sticks, crafting wire, and thermacol sheets. The students were given the task to make models such as tower making, bridge making, house making.

  
Dr. Jayant K. Tuli  
Director  
Tula's Institute, Dehradun

The aim of the induction program is to help students who come from diverse backgrounds to adjust to the new environment and inculcate in them the ethos of skills and human values. This competition was conducted in order to engage students to show their creativity and also to give wings to their imagination and thoughts. The competition was all about the enhancement of the students.

This activity was designed as a group fun activity where 10-15 members of students worked together to achieve a common goal and respective objective under different teams as **A, B, C, D, E, F, G, H,& I.**

Model Making activity was organized to provide the students with the problem statement and raw materials. The aim is to check the understanding and concept clarity of the students through a 360-degree knowledge test, where they have to conceptualize ideas, design, get involved in resource management and exhibit the models. In a time-bound event, the students compete to develop models which are evaluated on the basis of functionality, usability, and stability. The

presentation of the models made by the students is also judged and evaluated. These events develop critical thinking skills in the students, by providing them with a fun-filled activity-based learning time.

Before the start of the activity, students were briefed about the bridges and tower their different functions and applications, and also shown various types of bridges and structures through the help of a Powerpoint presentation. They were also briefed about the process to create such models by using materials like Bamboo sticks, Thermopolis Sheets, Popsicle sticks, etc provided on different days. The theme assigned to the students was based on Rural and Urban cities.

## Day 4

### Ice Breaking and Team Building Activities

The Tulas Institute's induction program prioritized fostering a sense of community among its incoming first-year students. To achieve this, they implemented several engaging activities. One such activity was a variation of the classic "Two Truths and a Lie." Students took turns sharing three statements about themselves, two of which were true and one a creative fabrication. The group then tried to guess the lie, sparking laughter and conversation as students revealed unexpected details about themselves. Another activity that got students moving was a "Find Someone Who" scavenger hunt.

A list of prompts was prepared, each requiring students to find someone who matched the description, such as "Find someone who speaks three languages" or "Find someone who has the same hometown as you." This encouraged students to mingle, discover shared interests, and build connections. Finally, the Tulas Institute incorporated a collaborative art project. Students were divided into small groups and provided with art supplies. Each group created a mural or piece of art that represented their hopes and dreams for their time at the institute.

This activity fostered teamwork, creativity, and a sense of belonging as students contributed to a shared project that will be displayed in the institute.

### Objectives

- Break the ice & build connections.
- Discover shared interests & spark friendships.
- Encourage teamwork & creative expression.

## Day 5

### Santala Devi Trek with a Cleanliness Drive: A Rewarding Challenge

The Santala Devi trek, nestled in the Garhwal Himalayas, culminated in a unique opportunity to combine physical challenge with environmental responsibility. This trek led participants to the sacred Santala Devi temple, rewarding them with breathtaking views and a sense of spiritual connection. However, the program extended beyond the traditional trek. It incorporated a vital cleanliness drive, aiming to leave the mountain trails pristine for future generations.

Participants engaged in collecting waste along the designated route, promoting eco-consciousness and minimizing the environmental impact of their journey. This initiative fostered a sense of responsibility towards the natural environment and educated participants on the importance of sustainable travel practices. By combining the trek with a cleanup effort, the program fostered a deeper appreciation for the beauty of the Himalayas while ensuring its preservation.

#### Objectives

- Promote Adventure and Physical Well-being
- Foster Environmental Responsibility
- Combine Spiritual Connection with Environmental Action

## Day 6

### Unveiling Your Compass: The Wheel of Life Activity

The Tulas Institute's induction program delved deeper into self-discovery through the "Wheel of Life" activity. This introspective exercise provided students with a visual tool to assess their current level of satisfaction in various key life domains. Imagine a wheel divided into sections, each representing an important area like career, health, relationships, finances, personal growth, and fun. Students then evaluated their satisfaction in each domain on a scale, typically from very dissatisfied to very satisfied.

By plotting these scores on the wheel, a clear visualization emerged, highlighting areas that flourished and those that might have required more attention. This self-reflection allowed students to identify personal priorities and set goals for a more balanced and fulfilling life. Perhaps a student scored low on "fun and recreation," prompting them to consider joining a club or exploring new hobbies. The Wheel of Life empowered students to take ownership of their well-being and chart a course for a future aligned with their values.

This activity went beyond mere self-assessment. After completing the individual wheel, students engaged in group discussions, sharing their insights and offering support to their peers. This fostered a sense of community and allowed students to learn from each other's experiences, creating a supportive network as they embarked on their academic journey.

### Objectives

- Assess satisfaction in key life areas (career, health, relationships, etc.).
- Identify personal priorities and set goals for a more balanced life.
- Foster a supportive community through shared self-reflection.

### **Unleashing Creativity: The Tulas Institute Painting Competition**

The Tulas Institute induction program culminated in a vibrant "Painting Competition," where first-year students expressed themselves artistically. This activity provided a platform for students to showcase their creativity and explore various artistic mediums. Whether seasoned painters or complete novices, the competition encouraged all participants to embrace the joy of artistic expression.

The competition could be structured in a few ways. The theme could be open-ended, granting students complete creative freedom, or it could be centered on a specific topic relevant to their new student experience, like "First Impressions of Tulas Institute" or "Hopes and Dreams for the Future." This flexibility catered to diverse artistic styles and allowed students to connect the theme to their own experiences.

This past induction program's painting competition fostered a sense of community and celebrated the unique talents of each student. Friendly competition created a lively atmosphere, while an exhibition of the completed works allowed participants to admire each other's creations and celebrate the collective artistic spirit of the incoming year.

### **Objectives**

- Showcase creativity and explore artistic mediums in a welcoming environment.
- Express individual perspectives through a chosen theme (open-ended or specific).
- Foster community spirit and celebrate diverse artistic talents through friendly competition and exhibition.

## Day 8

### Motivational session and career guidance

The Tulas Institute's induction program concluded with a powerful one-two punch: a motivational session followed by career guidance. This final act served as a springboard, igniting a fire of enthusiasm and purpose within the incoming students. An inspiring speaker, perhaps a successful alumnus or a renowned figure, would have shared their personal journey, detailing their experience overcoming challenges and achieving their dreams. This session aimed to instill a growth mindset, encouraging students to view obstacles as opportunities for learning and development.

Following the motivational session, the program transitioned to career guidance. Here, students gained valuable insights into navigating the professional landscape. Experts likely conducted workshops on resume writing, interview skills, or exploring potential career paths aligned with their academic interests. This practical advice equipped students with the tools and knowledge they needed to chart their course towards future success.

By combining motivation with practical guidance, the Tulas Institute empowered their new students to not only dream big but also develop the necessary skills and strategies to translate those dreams into reality. This holistic approach set them on a path towards a fulfilling academic journey and a rewarding career.

### Objectives

- Ignite passion and a growth mindset through inspiring talks.
- Equip students with practical skills for career exploration and success.
- Empower students to bridge the gap between dreams and reality.

## Day 9

### Himalayan Day Celebration

The excitement from yesterday's painting competition likely carried over as the next day marked a special occasion - Himalayan Day, celebrated on September 9th, 2022. This national event served as a timely reminder of the immense importance of the Himalayas. The Institute most likely organized activities focused on environmental awareness and appreciation for this majestic mountain range. These activities could have included a documentary screening, a guest lecture by an environmental expert, or even a tree-planting initiative. Participating in these activities allowed students to not only celebrate the Himalayas but also become responsible stewards of this vital ecosystem.

### Objectives

- Celebrate Himalayan Day & raise awareness of its significance.
- Engage students in environmental activities & foster appreciation for the Himalayas.
- Promote responsible stewardship towards this vital ecosystem.

### Building Synergy: The Power of Team-Building Activities

The Tulas Institute's induction program culminated in a series of engaging team-building activities, recognizing the importance of teamwork throughout a student's academic and professional life. These activities, designed to be both fun and challenging, fostered communication, problem-solving, and a sense of shared purpose amongst the new students.

One example was the "Blindfolded Maze" challenge. Students worked together, with one teammate blindfolded and guided by the verbal instructions of their sighted partner. This activity promoted clear communication and trust-building as they navigated the maze together. Another option employed during the program was a "Scavenger Hunt with a Twist." Teams raced against each other to find hidden clues, but the twist was that they had to collaborate with other teams to decipher the clues and complete certain tasks. This fostered cooperation, strategic thinking, and a sense of friendly competition.

Through these thoughtfully designed activities, students learned the power of teamwork and developed essential skills like active listening, effective communication, and collaborative problem-solving. These skills will not only benefit them in the classroom but also prepare them for future success in group projects, internships, and ultimately their chosen careers.

### Objectives

- Strengthen new friendships and build a foundation for collaboration.
- Develop essential teamwork skills like communication and problem-solving.
- Prepare students for future success in group projects and professional settings.

## Day 11

### Winding Down with Mindfulness: The Yoga Session

The Tulas Institute's induction program concluded with a calming and centering yoga session. This provided a welcome contrast to the energetic team-building activities and served several purposes. Yoga, incorporating physical postures (asanas), breathwork (pranayama), and meditation, offered a holistic approach to well-being for the new students.

The physical postures likely improved flexibility, strength, and balance, potentially reducing stress and promoting relaxation. The breathwork exercises likely helped students connect their mind and body, fostering a sense of inner peace and mindfulness. Finally, the meditation component allowed students to quiet their minds and focus on the present moment, a valuable skill for managing stress throughout their academic journey.

This yoga session served as a bridge between the excitement of the induction program and the demands of academic life. By incorporating mindfulness practices, the Tulas Institute equipped students with tools to manage stress, improve focus, and cultivate a sense of inner well-being. This set them up for a successful and enriching academic experience.

### Objectives

- Promote relaxation and stress reduction after a stimulating program.
- Enhance physical well-being through postures and improve focus through breathwork.
- Cultivate mindfulness and equip students with stress-management tools for academic life.

### Extending a Helping Hand: The Clothes Donation Drive

The Tulas Institute concluded its induction program with a thoughtful initiative - a clothes donation drive. This charitable act allowed students to not only declutter their belongings but also contribute to the well-being of those in need within the Garhwal community.

Donation bins were placed at convenient locations throughout the institute, and students were encouraged to contribute gently used clothing items. The institute likely partnered with a local NGO or shelter to ensure the donated clothes reached those who would benefit most. This act of generosity fostered social responsibility and allowed students to connect with the wider community.

Participating in the clothes donation drive provided a valuable learning experience for the students. They gained firsthand knowledge about the importance of giving back and the power of community service. It instilled a sense of compassion and encouraged them to consider the needs of others throughout their academic journey and beyond.

### Objectives

- Promote social responsibility and connect with the Garhwal community.
- Provide an opportunity for decluttering and contributing to those in need.
- Instill a sense of compassion and the value of giving back to others.

## Day 13

### Charting the Course: Goal Setting Activity

The Tulas Institute extended its focus on student empowerment into the next day with a dedicated goal-setting activity. This session equipped students with the tools and strategies to navigate their academic journey with purpose and direction.

The activity likely involved a guided workshop or individual reflection exercises. Students were encouraged to consider their short-term and long-term goals, both academic and personal. This could have involved setting achievable milestones for the upcoming semester, identifying areas for academic improvement, or outlining career aspirations.

Through this activity, students learned the importance of setting SMART goals (Specific, Measurable, Achievable, Relevant, and Time-bound). This framework helped them translate their ambitions into tangible action plans, fostering a sense of ownership and accountability for their academic success. Additionally, the program might have offered resources or mentorship opportunities to help students achieve their goals throughout their time at the institute.

By prioritizing goal setting early on, the Tulas Institute empowered students to take an active role in shaping their academic experience. They developed a roadmap for success, fostering a sense of agency and motivation as they embarked on their studies.

### Objectives

- Equip students with tools and strategies for setting effective academic and personal goals.
- Foster a sense of ownership and accountability for academic achievement through SMART goal setting.
- Empower students to take an active role in shaping their academic journey through goal planning

## Day 14 and 15

### Fostering Connection: Interaction with Department Heads

The Tulas Institute concluded its induction program with a valuable session – interaction with the heads of various academic departments. This provided a unique opportunity for students to gain firsthand insights from the leadership of their chosen fields.

Department heads delivered informative presentations, outlining the curriculum, faculty expertise, and potential career paths for graduates within their respective departments. This comprehensive overview allowed students to solidify their academic choices or explore exciting new options that might align with their interests.

Following the presentations, a lively Q&A session ensued. Students actively engaged, asking insightful questions about specific programs, course content, and future career possibilities. This direct interaction with department heads proved invaluable in clarifying any lingering doubts and fostering a sense of connection with the academic leadership.

By providing this platform for open dialogue, the Tulas Institute successfully bridged the gap between students and faculty. This sets the stage for a collaborative learning environment where students feel comfortable approaching their department heads for guidance and support throughout their academic journey.

### Objectives

- Deepen understanding: Students gained insights into department curriculum, faculty expertise, and career paths.
- Solidify choices or explore new options: The session helped students confirm their academic direction or discover exciting possibilities.
- Bridge the gap with faculty: Direct interaction fostered connection with department heads and encouraged future communication.

## **Day 16 and 17**

### **Unleashing Creativity: Tulas' Got Talent**

The Tulas Institute induction program culminated in a vibrant celebration of student talent – "Tulas' Got Talent." This exciting event provided a platform for first-year students to showcase their unique abilities and express themselves creatively. Whether it be singing, dancing, beatboxing, magic tricks, or even stand-up comedy, the stage was open to a diverse range of talents.

The atmosphere crackled with energy as students cheered each other on. Some participants opted for solo performances, while others formed groups to create captivating routines. The talent show not only provided entertainment but also fostered a sense of community and camaraderie among the new student body.

The program might have included a judging panel of faculty members or even fellow students, awarding prizes for the most outstanding performances. But beyond the competition aspect, "Tulas' Got Talent" served a more significant purpose. It allowed students to step outside their comfort zones, embrace their individuality, and gain valuable experience performing in front of a large audience. This confidence boost sets the stage for their academic journey, encouraging them to actively participate and contribute to the vibrant Tulas Institute community.

### **Objectives**

- Showcase diverse talents: Provided a platform for students to express themselves through singing, dancing, etc.
- Foster community and camaraderie: Promoted a sense of belonging and connection among the new student body.
- Build confidence and stage presence: Encouraged students to step outside their comfort zones and perform in front of an audience.

## Day 21

### Fresher's Day

The much-awaited Freshers' Day program was held in the auditorium of Tula's Institute, Dehradun on 22nd September 2022 after the successful completion of 21 days induction program. With the theme 'Prom Night', the day created an opportunity for students to showcase their talents and entertain the audience. The benevolent welcome of seniors to the freshers boosted their confidence and generated a friendly atmosphere between them.

The program was anchored by Shristi Soumya of BSc Agriculture 2nd year. The program began with an introduction of various student clubs of the Tula's Institute followed by a welcome song by Adnan of B. Tech CSE 2nd Year. The seniors also entertained them with excitement, enthusiasm, and laughter.

The newcomers introduced themselves and displayed their potential during the Mr. and Miss. Freshers competition where Shivam Negi of BBA 1st year and Shambhavi Raj Chouhan of BBA 1st year were felicitated by the grand title. On the occasion Vice President, Mr. Raunak Jain, and Vice President of Technology Dr. Raghav Garg of Tula's Institute felicitated Mr. Induction Piyush Gupta MBA 1st Year and Miss induction Divya Shankar BBA 1st Year, Mr. Emmanuel Gabriel and Miss Nidhi Goyal faculty coordinators of student council also marked their presence.
